Circuits and Networks

This second edition of ***Circuits and Networks:*** Analysis, Design, and Synthesis serves as a textbook for the undergraduate students of electrical, electronics, and instrumentation engineering. The new approach using MATLAB-based problem solving enhances the book's utility among professionals and practitioners as well as for laboratory-based learning.

The new edition is succinct in its method of explanation and provides increased number of solved examples for better understanding of concepts. It introduces new topics such as Bode plots, four-wire systems, and composite filters in a very lucid manner that enhances the overall coverage of the book. The vast number of numerical problems, neat circuit diagrams, and applications of various tools and techniques continue to be the best pedagogical features of this book. This book is an invaluable comprehensive resource for students, faculty, and professionals.

New to this edition:

- Approximately 400 new solved examples.
- MATLAB-based solved and unsolved problems
- Addition of new topics: sawtooth signals, doublet, four-wire system, terminating half section, composite filters, Bode plots, etc.
- Simplified and lucid manner of explanation

Praise for the First Edition

The book provides a good knowledge base … 'Three Phase Circuits' and 'Problems based on Mesh and Nodal Analysis' are the best explained topics of the book.

Dr. S. Nagarajan (Professor and Head, Jerusalem College of Engineering, Chennai)

Basics are very clearly explained in this textbook. Every student can easily understand the subject. Solved problems are very helpful to practice.

P.B.N. Sarojini (TRR College of Engineering and Technology, JNTU Hyderabad)

M.S. Sukhija, a PhD from Panjab University, was the founder principal of Guru Nanak Dev Engineering College, Bidar, Karnataka.

T.K. Nagsarkar was formerly Professor and Head, Department of Electrical Engineering, Punjab Engineering College, Chandigarh.

Dr Nagsarkar and Dr Sukhija have also jointly authored *Basic Electrical Engineering* 2e (OUP, 2011), ***Basic Electrical and Electronics Engineering*** (OUP, 2012), and *Power System Analysis* 2e (OUP, 2014).

ONLINE RESOURCES india.oup.com

The following resources are available to support the faculty and students using this text:

For Faculty
- Solutions Manual with solutions to MATLAB-based problems
- Power Point Slides

For Students
- Test generator based MCQs
- MATLAB-based practice programs
